

$$2 \div 1.77828 = 1.124682$$

$$1.124682 \div 1.074607 = 1.046598, \text{ 等等}$$

$$\begin{aligned} \therefore 2 &= (1.77828)(1.074607)(1.036633)(1.0090350)(1.000573) \\ &= 10 \left[\frac{1}{1024} (256 + 32 + 16 + 4 + 0.254) \right] = 10 \left[\frac{308.254}{1024} \right] \\ &= 10^{0.30103} \qquad \left(\frac{573}{2249} = 0.254 \right) \end{aligned}$$

$$\therefore \log_{10} 2 = 0.30103$$
